BEST IDEAS EQUITY
FACTOR-BASED MODEL PORTFOLIO STRATEGY

▲ FACTOR-BASED

STRATEGY

In seeking to pursue its investment objective, the portfolio is designed to provide exposure to high quality companies (10 Canadian, 10 US and 10 International stocks) across all our universes that consistently generate shareholder wealth, while trading at attractive price. This strategy is based on our proprietary multi-factor quantitative models.

OBJECTIVES

1. Target long term capital appreciation among the best opportunities available.
2. Consistently deliver performance over a custom blended benchmark.
3. Maximize tax efficiency by having a low portfolio turnover ratio.
RISK RATING

Medium-High
REASONS TO INVEST

- ❖ Historically outperformed benchmark.
- ❖ Risk-adjusted return performance.
- ❖ Consistent investment process.

INVESTMENT PROCESS

AS OF JUNE 30TH, 2023

Custom TR = 1/3 S&P/TSX + 1/3 S&P 500 + 1/3 MSCI ACWI Ex US
